The European Conference on Ambient Intelligence (Aml) is the prime venue for research on Ambient Intelligence, with an international and interdisciplinary character. It brings together researchers from the fields of science, engineering, and design working towards the vision of Ambient Intelligence. Ambient Intelligence represents a vision of the future where we shall be surrounded by invisible technological means, sensitive and responsive to people and their behaviors, deliver advanced functions, services and experiences. Ambient intelligence is expected to combine concepts of ubiquitous technology, intelligent systems and advanced user interfaces putting the humans in the center of technological developments.

Aml 2015 will bring together researchers from academia and industry, to identify and discuss technical challenges, exchange novel ideas, explore enabling technologies, and report latest research efforts that cover a variety of topics. The 2015 edition will be held in Athens, Greece during 11-13 November 2015.
